Daily feeding guide for Cattle Nuts

The following is a daily suggested feeding rate based on a dry cow or steer. Introduce slowly and build up to full ration over a two week period to avoid any occurrence of grain poisoning if animals haven't been fed on a grain based feed before.

Day 1-5 0.5kg **Day 6-10** 1-3kg
Day 11-15 3-5kg **Day 15+** 5kg+

Best results achieved with daily feeding.

Eskalin can be added with an S4 Vet script.

**The above table is a Nutrient Composition as fed. Actual ingredients and proportions of these nutrients may vary in micro analysis. Many factors influence feed quality and animal performance.

The above feeding rates are a guide only. Variances due to pasture quality, climate, workload and age of the animal will give different results. This product is suitable for ruminants only and not recommended for other animals. Please use the feeding table as a guide only and ensure feeding guide is introduced gradually to all animals, as unobserved diet changes can be detrimental to final results or the animals health.
