

# Layer Pellets

## For Eggs With Golden Yolks

A highly digestible feed, formulated to provide laying hens with adequate energy for maximum egg production. Ingredients are carefully selected to ensure a lack of separation and reduce wastage. The average backyard or free range hen will lay for 5 out of 7 days over a year.

### Ingredients

Wheat, bran, pollard, cottonseed meal, lupins, meat meal, limestone, salt methionine, and layer vitamin and mineral premix.

### Feeding Directions

To be fed ad-lib to mature laying birds from 18 weeks of age onward. General intake approx 125 to 135 grams per head per day. Suitable for mature birds.

**20kg Bag  
 or Bulka Bag**
