Furneys Furear 20% Dry Season Block is a versatile protein & mineral block that contains all the essential nutrients, suitable for feeding to cattle and sheep. Urea activates microbes in the rumen that assist in the production of bacteria. These bacteria promote eating and efficient digestion of dry grasses, scrub and stubble. In dry periods utilising this herbage can have significant financial benefits.

### FEEDING GUIDE

Furneys Furear 20% Dry Season Blocks are recommended to be fed based on the feeding table below. Do not feed to equines, starving animals or animals in poor condition. Ensure there is sufficient forage available when feeding this product and be wary when product is wet.
