Furneys Calcium Molasses Block is designed to assist in calving and lambing sickness in sheep, goats and cattle. This block is designed to provide calcium and the correct proteins and minerals to assist digestion, bettering conversion rates. Hypocalcemia commonly related to post-birth is caused by calcium deficiency.

Calcium needs to be supplemented to grazing pastures. It is a palatable block providing sodium, calcium, molasses and ammonium chloride which research shows assist in the absorption of calcium as an acid salt. This block also contains magnesium assisting with grass tetany.
