

FURNEYS STOCK FEEDS

Feeding the country's livestock for over 101 years

COPPER COBALT BLOCK

AVAILABLE IN 20KG HARD PRESSED BLOCKS

NUTRITIONAL ANALYSIS

CRUDE PROTEIN	0.24%
MOLASSES	5.0%
CALCIUM	4.8%
COPPER	1250 mg/kg
COBALT	44 mg/kg
SODIUM CHLORIDE MAX.	82.0%

Furneys Copper Cobalt Block is suited to areas of the North Coast and New England or where rye grass pasture is grazed, where a copper or cobalt deficiency can occur in sheep, cattle and goats. Cobalt deficiency can cause loss of appetite, muscle wasting, anemia and scaly ears. A copper deficiency causes emaciation, stunted growth, swing back in lambs and a dull coat. The block is also useful in areas where copper deficiency occurs in the soil. Furneys Copper Cobalt Block is not suited to areas where stock have access to patterson's curse or heliotrope plants or where copper poisoning occurs.

FEEDING GUIDE

Furneys Copper Cobalt Blocks are recommended to be fed based on 1 block per number of head, refer to feeding table below.

INGREDIENTS

Salt, Ground Limestone, Copper Sulphate, Flavour Attractant and Molasses.

FEEDING TABLE

ANIMAL TYPE	NUMBER OF HEAD	NUMBER OF DAYS
CATTLE	10	28
SHEEP / GOATS	70	28

WARNING

This product is suitable for sheep, cattle and goats only and is not recommended for other animals. The above feeding rates are a guide only. Variations due to pasture quality, climate, workload and age of the animal will give different results. Please use the feeding table as a guide only and ensure feeding is introduced gradually to all animals, as unobserved diet changes can be detrimental to final results or the animals health. This product does not contain UREA. This product does not contain restricted animal material. Always ensure clean drinking water is available.
