Furneys Iodised Salt Block is designed to supplement and reduce the occurrence of thyroid gland enlargement or "goiter" in sheep and cattle. Certain feeds (of the cabbage family, turnip and rapeseed) contain goitrogens which interfere with the use of thyroxin and may produce goiter's. Iodised salt is the most economical way of supplementing and relieving the occurrence of thyroid gland enlargement or goiter. Blocks allow for free choice feeding.

FEEDING GUIDE

Furneys Iodised Salt Blocks are recommended to be fed based on 1 block per number of head, refer to feeding table below.

INGREDIENTS
