

FURNEYS STOCK FEEDS

Feeding the country's livestock for over 101 years

MOLYBDENUM BLOCK

AVAILABLE IN 20KG HARD PRESSED BLOCKS

NUTRITIONAL ANALYSIS

SODIUM CHLORIDE	70.0%
LIME	13.0%
SULPHUR	1.0%
MOLASSES	5.0%
SODIUM MOLYBDATE	0.3%
SODIUM SULPHATE	3.8%

Furneys Molybdenum Blocks are designed for use in pasture's with a high copper content. It is believed that molybdenum binds and inactivates copper in the intestine. A low molybdenum intake causes excess copper, which may lead to fatal jaundice. By making molybdenum available this problem will be reduced. High molybdenum intake will induce a copper deficiency, characteristics are stringy wool, anemia, bone disorders and scouring. Using a salt block ensures minimal intake. Salt increases thirst and in most circumstances is a positive attractant.

FEEDING GUIDE

Furneys Molybdenum Blocks are recommended to be fed based on 1 block per number of head, refer to feeding table below.

INGREDIENTS

Salt, Ground Limestone, Sodium Molybdate, Sodium Sulphate and Molasses.

FEEDING TABLE

ANIMAL TYPE	NUMBER OF HEAD	NUMBER OF DAYS
CATTLE	10	28
SHEEP / GOATS	70	28

WARNING

This product is suitable for sheep, cattle and goats only and is not recommended for other animals. The above feeding rates are a guide only. Variances due to pasture quality, climate, workload and age of the animal will give different results. Please use the feeding table as a guide only and ensure feeding is introduced gradually to all animals, as unobserved diet changes can be detrimental to final results or the animals health. This product does not contain UREA. This product does not contain restricted animal material. Always ensure clean drinking water is available.
